The world, as it actually looks.

20 game pieces / 22 unedited screenshots / two interface repairs

The road, home and cartridge-game idea is visible. The current art, world dressing, map presentation and cartridge playfields do not yet deliver the finished world promised by the spec.

14 Route map
15 Cartridge shelf
16 Waste Heap · square handheld
17 Bunker Breaker · portrait handheld
18 Last Mile · landscape handheld
19 Rust Runners · console
20 Home at night

Evidence limits: distant stops were staged for photography; the clock was held; four cartridges were fixture-unlocked. These images are not nationwide driving, full cartridge playthrough or authenticated MMO proof. The tour predates the current traffic repair.

Test captures used disposable isolated profiles. The earlier overwritten normal player save remains unrecovered. Original frames are retained beside the later dossier and atlas repairs; no release-readiness claim is made.

01 / Title

Clear amber/ink controls; the empty background does little to establish the world.

SOURCE 01_title.png
REAL GAME CAPTURES - NO RETOUCHING

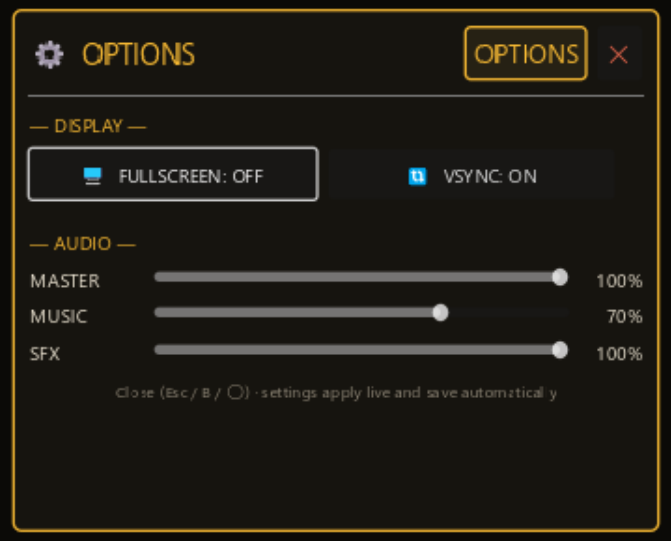

02 / Controls

Keyboard and pad bindings are visible together. Dense rows need continued small-screen scrutiny.

SOURCE 02_title_controls.png
REAL GAME CAPTURES - NO RETOUCHING

03 / Options

Basic display/audio controls work visually; presentation and options depth are still limited.

SOURCE 03_title_options.png
REAL GAME CAPTURES - NO RETOUCHING

04 / First highway start

The starter car is on the actual road. The surrounding roadscape is still sparse.

SOURCE 04_new_game_highway.png
REAL GAME CAPTURES - NO RETOUCHING

05 / Meridian safehouse

Fixed this pass: grounded signs replace huge banners. Plain geometry, NPC labels and the portal still dominate.

SOURCE 05_meridian.png
REAL GAME CAPTURES - NO RETOUCHING

06 / Appalachian interstate

Divided road geometry reads clearly. The region needs richer vegetation shapes and roadside stories.

SOURCE 06_appalachian_highway.png
REAL GAME CAPTURES - NO RETOUCHING

07 / Colorado highway

Western road elevation exists, but abrupt shoulder forms and repetitive terrain remain visible.

SOURCE 07_colorado_highway.png
REAL GAME CAPTURES - NO RETOUCHING

08 / Road Office

The original Blender-authored shelter, freight and parking give this stop a recognizable purpose.

SOURCE 08_road_office.png
REAL GAME CAPTURES - NO RETOUCHING

09 / Freight desk

Actual job interaction. The panel correctly says local authority; this is not a shared MMO economy.

SOURCE 09_freight_desk.png
REAL GAME CAPTURES - NO RETOUCHING

10 / Cottage porch

Readable approach and improved house detail. Repeated neighboring houses need more individual history.

SOURCE 10_home_porch.png
REAL GAME CAPTURES - NO RETOUCHING

11 / Cottage interior

Real doorway entry and roof cutaway. Furnishings and meaningful household activities remain sparse.

SOURCE 11_home_inside.png
REAL GAME CAPTURES - NO RETOUCHING

12 / Backpack

Item actions and a visible close affordance are clear. The empty starter pack makes the panel feel oversized.

SOURCE 12_backpack.png
REAL GAME CAPTURES - NO RETOUCHING

13 / Character sheet

Original tour view: cramped prose, weak hierarchy, and no visible header/close control. This has since been repaired; see the five current dossier views and verification. The original image is retained rather than silently replaced in this historical tour.

SOURCE 13_character_sheet.png
REAL GAME CAPTURES - NO RETOUCHING

13 / Character sheet - REPAIRED VIEW

Current repaired view: the condition diagram no longer competes with the record, and close/scroll controls are visible. Long prose and placeholder iconography still need refinement.

SOURCE 01_dossier.png

REAL GAME CAPTURES - NO RETOUCHING

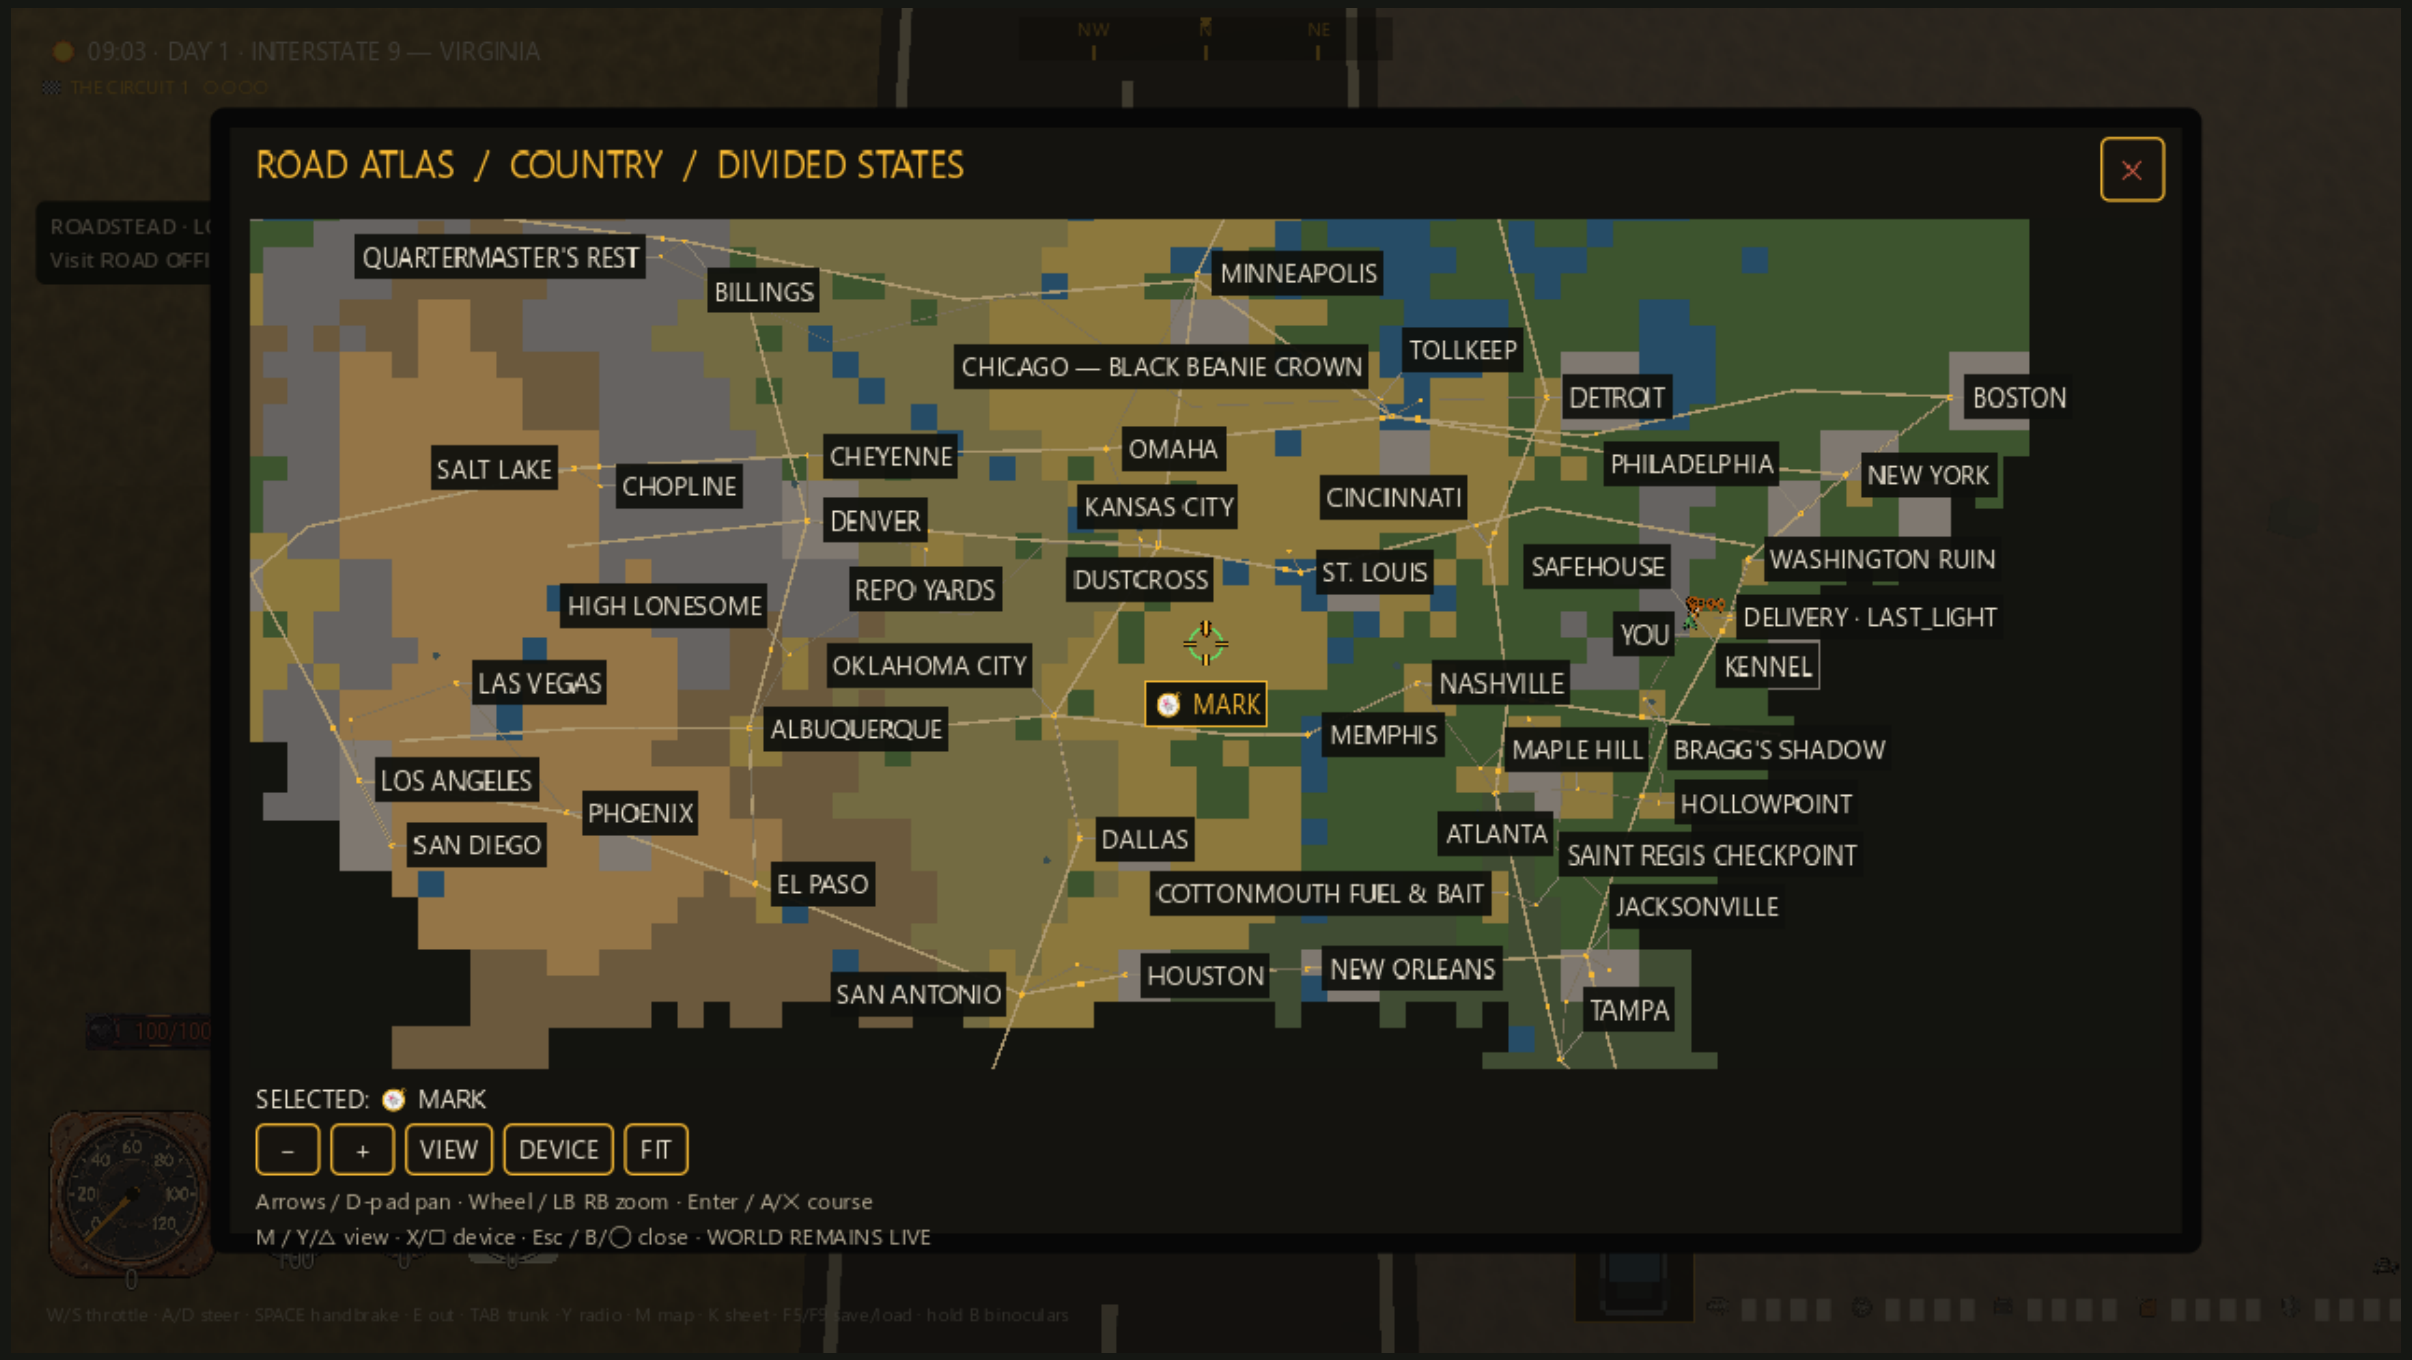

14 / Route map

Original tour view: the scavenged GPS fits the fiction, but crowded tiny labels undermine navigation. See the current atlas, GPS and portrait phone views for the subsequent repair. This original frame is retained, not silently replaced.

SOURCE 14_route_map.png
REAL GAME CAPTURES - NO RETOUCHING

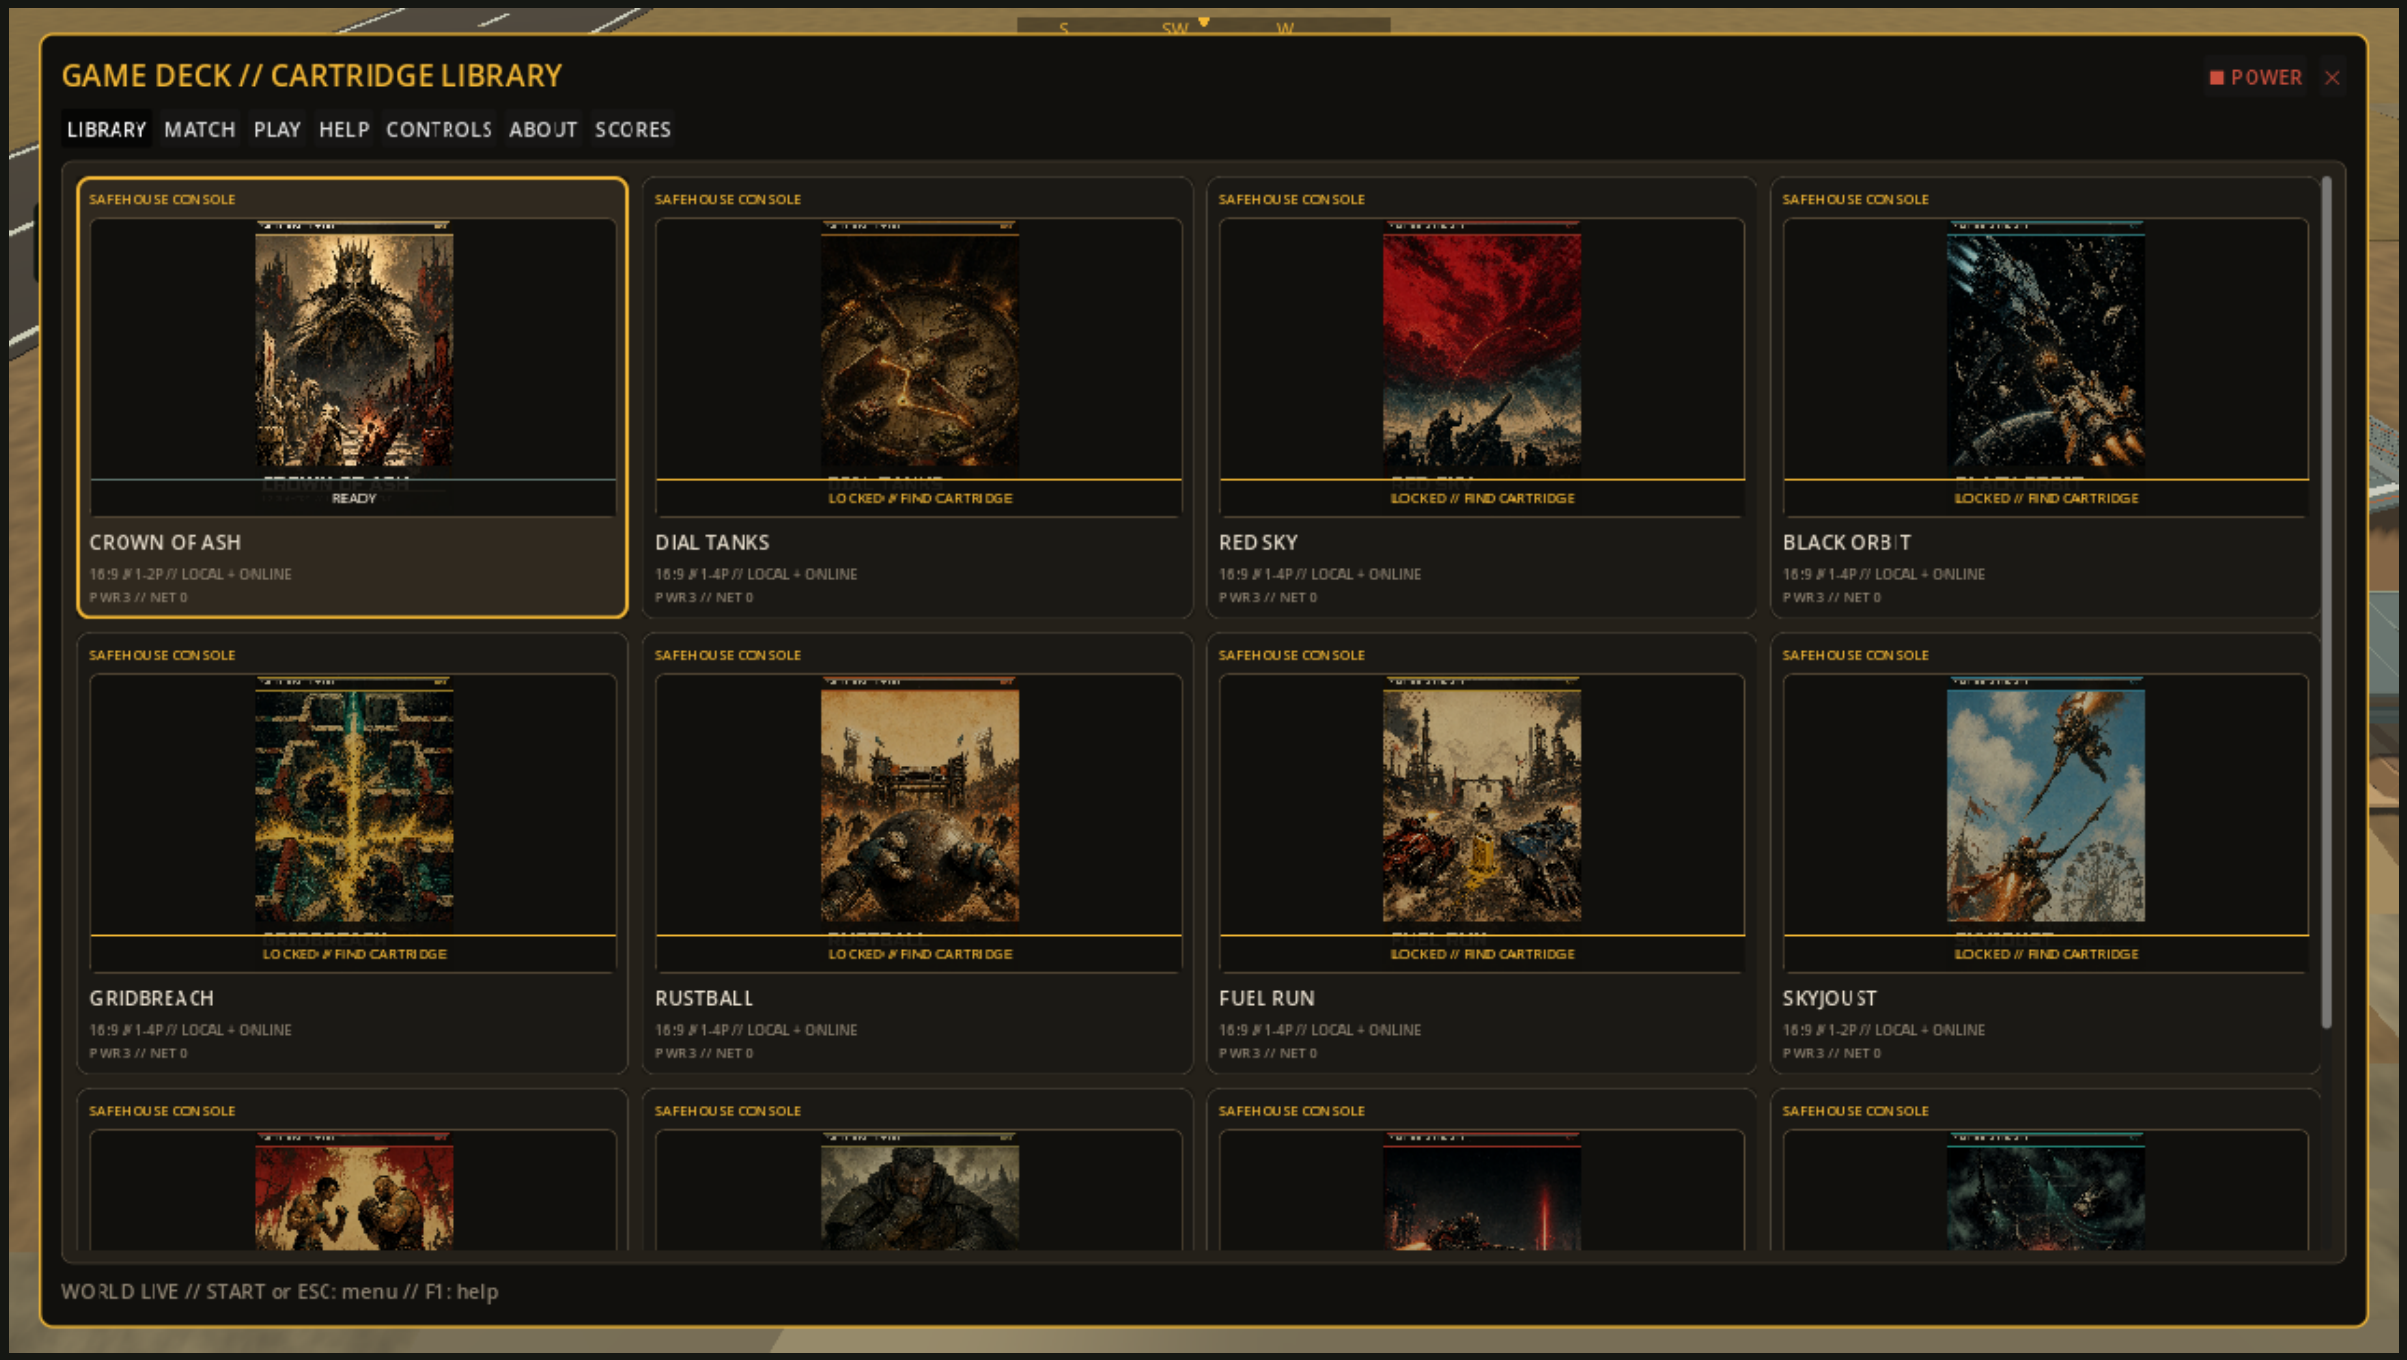

14 / Route map - REPAIRED VIEW

Current repaired course-planning view: the larger frame exposes selected stops and controls. The coarse biome mosaic and thin roads still look unfinished. This uses the valid course-planning capture; the separate country-overview PNG has an internal compressed-data checksum error, retained and disclosed in the atlas audit.

SOURCE 04_country_course.png

15 / Cartridge shelf

Box art is visible in the shared shell. The illustration quality exceeds several games' current playfields.

SOURCE 15_console_library.png
REAL GAME CAPTURES - NO RETOUCHING

16 / Waste Heap · square handheld

Running 1:1 merge board. Clean but visually plain; it needs more world-specific character.

SOURCE 16_waste_heap_square.png
REAL GAME CAPTURES - NO RETOUCHING

17 / Bunker Breaker · portrait handheld

Running 9:16 playfield without stretching. Brick and effects presentation remains basic.

SOURCE 17_bunker_breaker_portrait.png
REAL GAME CAPTURES - NO RETOUCHING

18 / Last Mile · landscape handheld

Running 16:9 driving game. Sparse scenery and status text over the car area need polish.

SOURCE 18_last_mile_landscape.png
REAL GAME CAPTURES - NO RETOUCHING

19 / Rust Runners · console

Running 16:9 platform shooter. This is not a near-1:1 Soldat visual result; arena and characters remain primitive.

SOURCE 19_rust_runners_console.png
REAL GAME CAPTURES - NO RETOUCHING

20 / Home at night

Warm practical light against dangerous darkness is closer to the spec's mood. Home activities still need depth.
